

# A tener en cuenta al reiniciar detritus

## Problemas

- Apache no reinicia bien

```
[root@detritus ~]# mkdir /var/run/httpd
[root@detritus ~]# chown apache.apache /var/run/httpd
[root@detritus ~]# systemctl restart httpd
```

- slurm no funciona → es un problema de munge

```
[root@detritus ~]# mkdir /var/run/munge
[root@detritus ~]# chown munge.munge /var/run/munge
[root@detritus ~]# systemctl start munge
```

## systemd status

## Fixes

- Apache

```
[root@detritus ~]# cat /opt/maintenance/fix_http.sh
#!/bin/bash
mkdir /var/run/httpd
chown apache.apache /var/run/httpd
systemctl restart httpd

[root@detritus ~]# chmod u+x /opt/maintenance/fix_http.sh
[root@detritus ~]# cat /etc/systemd/system/fix_http_atboot.service
[Unit]
Description=Fix httpd permissions and directories
After=httpd.service

[Service]
Type=simple
ExecStart=/opt/maintenance/fix_http.sh

[Install]
WantedBy=default.target

[root@detritus ~]# systemctl daemon-reload
[root@detritus ~]# systemctl enable fix_http_atboot.service
```

### Created symlink

```
/etc/systemd/system/default.target.wants/fix_http_atboot.service →  
/etc/systemd/system/fix_http_atboot.service.
```
